Event details

The Northern Lights are one of the most breathtaking natural spectacles visible in the Icelandic sky. To celebrate this year's Night of Museums, we invite you to the Embassy of Iceland in Poland for an engaging discussion about this remarkable phenomenon. Our guests will explain the science behind the aurora borealis and its place in Icelandic culture, art, and folklore. The event will also include an art workshop for children, where participants will create their own interpretations of the Northern Lights.

Practical informations

Meetings will be held in the Embassy's conference room (no access to other parts of the Embassy). Entry is granted only with a free ticket for specific program sessions. Registration opens on May 12 at 12:00.
