Event details

Through experimentation with various painting and sculptural techniques, the artist aimed to explore how obstacles in vision can influence the perception and interpretation of art by the viewer. Specifically, working with deconstructed and reflective surfaces in painting, she seeks to create dynamic compositions that invite viewers to interact with the artwork from various perspectives, thus questioning their preconceptions of reality.

Practical informations

Participation in the event is free. No registration required. Intended for the target audience. Visits will take place at designated times.
